## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 March 2004 has been entered.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The instantly claimed crystal, method for its production and uses thereof are patentable over the closest prior art of record: Wakamatsu et al (US 4,810,818 03-1989) and Nofre et al (US 5,480,668 01-1996). Applicants have persuasively argued (Remarks, page 6, lines 14-19, referring to Declaration of Professor Jerry Atwood) that one of ordinary skill in the art would not have had a reasonable expectation for success in the application of the process employed by Wakamatsu for Aspartame to the analogous compound Neotame. Because of the differences in structure between Neotame and Aspartame one of ordinary skill in the art could not reasonably have predicted that a polymorph having similar properties (improved solubility) to those observed in the case of Aspartame would result from treating Neotame with Wakematsu's process. Thus it would only have been obvious to try Wakematsu's process with Neotame.

Art Unit: 1621

The instantly claimed crystal, method for its production and uses thereof are therefore patentable over the closest prior art of record, Wakamatsu and Nofre.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
